

Operator-technologist who makes complex work visible, connects technical and business teams, and builds operating mechanisms that turn emerging technology into adopted, measurable outcomes. Leadership experience spans high-reliability electronics, 24/7 scaled operations, regulated autonomous systems, industrial logistics, robotics, machine vision, quality systems, and AI-enabled workflow transformation.

Executive Operating Cadence | High-Reliability Operations | Decision & Escalation Architecture | Engineering-Operations Integration | Quality Systems & Root Cause | Cross-Functional Dependency Management | AI-Enabled Workflow Design | Change Adoption

LEADERSHIP EXPERIENCE

Vape-Jet

2025-Present

Director of Operations

- Lead AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry, and AI-assisted workflows.
- Connect factory, field, customer, and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training, and accountability.
- Operate in a software-enabled robotics and machine-vision environment with approximately 1,000 fielded robots informing support and operating feedback loops.

Compunetics

2000-2013

Director of Operations and Engineering Management

- Progressed through R&D program management, production management, strategic acquisition, operations management, and director-level leadership.
- Led engineering, manufacturing, quality, customer delivery, and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, standard work, root-cause practices, performance measures, and process controls.
- Collaborated with high-consequence customers and partners including DoD, CERN, Intel, and AMD; published industry articles, delivered technical talks, and participated in the HyperTransport Consortium.

Amazon

2014-2018

Operations Management / Site Leader

- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward operating environment supporting approximately five million second-day orders annually.
- Built leadership routines, labor planning, throughput visibility, escalation paths, standard work, and operating mechanisms.
- Applied Lean and Gemba practices across safety, quality, throughput, customer experience, and team engagement.
- Contributed to logistics innovation through Prime Air research and Amazon Flex geolocation concepts.

ROLE-ALIGNED OPERATING MECHANISMS

Visibility

Connect fragmented operating, customer, field, and technical signals into one prioritized view.

Decision cadence

Use thresholds, escalation paths, aging, and closure instead of more status collection.

Quality & learning

Turn recurring recovery into root-cause work, standard work, measures, and reusable controls.

Adoption

Build mechanisms with the people doing the work so routines become operating behavior.

ADDITIONAL EXPERIENCE

ZeusVu 2018-2022

Chief Pilot, Autonomous Systems and Aerial Data Operations

- Led regulated drone operations across medical, energy, logistics, real-estate, and restricted-airspace contexts with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based concepts for automated aerial inventory and computer-vision-enabled field intelligence.
- Designed medical drone delivery and chain-of-custody concepts connecting technology, risk, stakeholders, and governed execution.

DudeWorth 2017-Present

Founder / AI and Automation Advisor

- Develop AI-readiness and opportunity frameworks assessing value, feasibility, data readiness, governance, adoption burden, reuse, and time-to-value.
- Design agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, decision records, evaluation, and governance rails.
- Advise on AI-enabled operations, logistics technology, warehouse automation, AMRs, ASRS, cobots, transportation systems, network analysis, and workflow design.
- Develop Core and DudexOS as agentic operating-model concepts; present them as concepts, not production deployments.

Cardinal Building Products 2021-2023

Regional Director

- Built the company's first remote regional operation.
- Modernized distributed customer, CRM, commercial, fulfillment, logistics, digital marketing, SEO, and online-buying workflows.

LEADERSHIP & CIVIC WORK

Enviro Social Capital 2014-2017

Chairman of the Board

- Co-founded and led a public-private impact initiative focused on sustainable infrastructure, green finance, and civic transformation.
- Helped shape and evaluate a \$200 million Social Impact Bond feasibility concept for Pittsburgh sewage and green-infrastructure improvement.

IEEE 2012-2016

CMPT and EDS Pittsburgh Chapter Chair

- Led regional technology programming connecting industry, academia, STEM outreach, electronics, manufacturing, and emerging technology.
- Organized conferences, seminars, business tours, and technical programming.

EDUCATION & CREDENTIALS

- University of Pittsburgh - Bachelor of Science
- Academic grounding: materials science, physical chemistry, biology-related studies
- IBM Enterprise Design Thinking Practitioner
- Six Sigma Certification
- OSHA 10

TECHNICAL & OPERATING TOOLKIT

Agentic AI | LLM workflows | RAG patterns | Human-in-the-loop design | Python | SQL | JavaScript | TensorFlow | Tableau | ERP/Odoo | Jira | Confluence | HubSpot | Slack | GIS and mapping workflows

ROLE-ALIGNED THROUGH-LINE

High-reliability technical operations -> scaled customer-backward execution -> regulated autonomous systems -> distributed operations -> AI-enabled robotics transformation. Connecting work: visibility, decision quality, cadence, standards, escalation, and adoption.
